

WELCOME TO TRAFFORD RESOURCES

Trafford Resources Limited is a Perth-based mineral exploration company which has been listed on the Australian Stock Exchange since Mid June, 2006.

Trafford's primary focus is exploring for Iron Oxide, Copper, Gold and Uranium (IOCGU) deposits at the Wilcherry Hill Project in South Australia's Gawler Craton. Trafford recently discovered large quantities of high grade magnetite iron and is currently investigating the feasibility of establishing iron ore operations at Wilcherry. Gold associated with some of the iron could be a major beneficial by-product.

Trafford also owns the Lynas Find Gold Project in the Pilbara region of Western Australia where it believes that significant gold reserves may remain from past mining.

Trafford's Directors, Ian Finch, Executive Director, and Neil McKay and Shane Sadleir, non-executive Directors, have more than 90 years experience between them in successful mineral exploration and mining projects.
